		The state of the s
1	A major exercise which involved units from Letzling Heath began on 17 August 1954. At about 1000, a large column arrived in Schernebeck from the direction of the training grounds. In Schernebeck, the column separated and four columns, two of which advanced toward Schoenwalde while the other two columns, as flank security details, proceeded toward the Elbe River north and south of the bulk of the movement. The northern group included approximately 80 tanks and 30 trucks which were presumably occupied by infantrymen. It proceeded to the Weissewarte Forest via Staglitz and took position at the northern edge of the woods. The position of the northernmost	25X1

The bulk of the units, in two groups, advanced from Schernebeck to the Buch area via Schoenwalde. Elements of the southern security group joined the bulk of the units in Schoenwalde. It was noted that these movements were performed very smoothly and with discipline and that the troops did not keep security distances. The movements were apparently directed by radio. Compared with march practices in 1953, the troops improved considerably. The bulk of the troops, which were headed by 8 T-34/85 tanks, included 17 JS tanks, 41 T-34/85 tanks 14 SP guns, 8 amphibious vehicles, 2 large assault boats, 40 trucks with pontoons, 6 x 122-mm field	25X1 25X1 25X1

8 single-engine aircraft, presumably ground attack planes, were observed over the maneuver area every 40 minutes.

25X1

On 18 August, 20 T-34/85 tanks, 5 SP guns, 12 x 122-mm and 152-mm field howitzers, 6 x 76.2-mm AT guns, 16 light and medium mortars, 20 trucks with infantry and train vehicles arrived from the depth of the maneuver area and crossed the Elbe River on ferries. Air activity was the same as on 17 August.

25X1

On 19 August, only a few ferries crossed the river in both directions. During the night on 19 August and in the early morning of 20 August, the troops returned to the training area in close order of march. On 21 August, the exercise was repeated. It did not go farther than to the Elbe River and there were no river crossings. These units returned to the training area during the night on 21 August.

25X1

Comment.

the exercises involved units of the 19th Gds
Mech Div and probably the bulk of the division. This was the last
division of the Third Shock Army which had not yet been observed
at such exercises. River crossing with ferries was observed during
exercises of several other divisions in the Soviet Zone during the
month of August. The fact, that the river was crossed by ferries
and that no bridge was built, might indicate that these exercises
were conducted with a view to a possible employment of atomic
weapons. The fact, that the air force also participated, stressed
the importance of the exercise. With these exercises, combinedarms training at the training grounds probably terminated before
the beginning of the fall maneuvers. According to other observations,
first elements of the division returned to the Magdeburg post on
21 August.
